

Senior Console Engineer

Emeryville, California

Job Description

Other Ocean Emeryville is seeking an experienced Senior Console Engineer to join our console development team, currently working on a PlayStation®4 exclusive title. A qualified candidate needs to be a self-starter with a passion for making games. You would work daily as part of a small team who believes strongly in maintaining a healthy work/life balance, all while developing premium console games.

Responsibilities:

- Write game, engine, and tools code using C/C++
- Help design, schedule, and implement features that meet game and console requirements
- Regularly debug, profile, optimize, and maintain engine and game code
- Provide PlayStation®4 platform expertise in supporting the rest of the development team
- Develop new features and mechanics within Unreal Engine 4
- Provide technical assistance by responding to inquiries regarding errors, problems, or questions within the project

Requirements:

- 5+ years of C++ experience (console experience preferred but not strictly required)
- Contributed extensively to the development of two or more shipped games, PC, console, or handheld
- Experience with technical requirements, API's, and developing for game consoles
- Excellent programming, debugging, and optimization skills

Recommended:

- Experience with Unreal Engine 4 with an understanding of Blueprints
- Experience developing for the PlayStation®4 game console
- Experience with Jenkins continuous integration methodologies and familiarity with Perforce version management software
- Experience implementing gameplay mechanics and features

Education:

- Bachelor's degree in Computer Science, Mathematics, or related field
- Or equivalent industry experience

Please submit resumes and inquiries to employment@otherocean.com with the subject "Senior Console Engineer".

About Us:

Other Ocean Group (otherocean.com) develops award-winning games and conducts Quality Assurance and Community Management ([Sculpin QA Company](#)) for the industry's most established publishers.

We are currently growing our team in Emeryville, CA. **Other Ocean Emeryville** is made up of a team of highly talented and experienced gurus who can do just about anything, including developing original games like **#IDARB** (idarb.com) and servicing our **Digital Eclipse** (digitaleclipse.com) brand which is focused on the preservation of video games and their heritage. The team is currently developing *MediEvil*, a remake of the 1998 PlayStation title of the same name.

We develop games for multiple platforms including **Xbox One, PlayStation®4, Nintendo Switch, PC, 3DS**, and more. If you are passionate and driven to do your best work, and have a desire to work in an independent developer setting, please apply online.
